RIOT FOCUSES ON REMOVING THE CHALLENGES OF MOBILITY AND COMPLEXITY FOR YOUR BUSINESS' ENDPOINT SECURITY.

From deployment to policy configuration and automation, our team has the expertise to manage your business devices securely.

Historically, endpoint management has relied on the protection of enterprise security controls. However, with a significant shift towards a diversified workforce, endpoint mobility can no longer rely on traditional techniques, with detection capabilities now trivial to bypass.

RIOT Endpoint-as-a-Service is built on Carbon Black Next-Gen endpoint detection and response technology enhanced by Splunk SOAR automation. Our highly trained and certified security engineers deploy tailored policy sets and implement an endpoint management methodology to meet the mitigating controls required for modern and secure business activities.
